

Senior EHS Engineer

Eighty Four, PA (near Pittsburgh) (onsite daily)

Form Energy is a U.S. technology and manufacturing company that is developing and commercializing cost-effective multi-day energy storage systems to enable the global electricity system to run on 100% low-cost renewable energy, every day of the year. Driven by Form's core values of humanity, excellence, and creativity, our team is deeply motivated and inspired to create a better world. We seek to transform the energy landscape and do our part in making the world better for all. We are supported by leading investors who share a common belief that low-cost, multi-day energy storage will be a key enabler of tomorrow's zero-carbon electric system.

Role Description

We are looking for an EHS Engineer to further develop and manage the daily functions of the Form Energy EHS program at our Eighty Four, PA and Weirton, WV facilities. You will be responsible for working with our EHS Site Lead, across both sites, to ensure our team is operating with best safety practices and to lead efforts to improve the culture of safety in the workplace. A self-starter, you will proactively mitigate new hazards and roll up your sleeves to quickly respond to critical situations in the most effective and efficient manner. Taking a collaborative approach, you'll work closely with all teams to provide a great and safe place to work and will serve as backup for the EHS Site Lead as needed. This is an exciting opportunity to shape and be part of the growth of a fast-moving technology start-up with breakthrough technology and an incredible mission!

What You'll Do

- Ensure day-to-day compliance with EHS policies and regulations
- Consult on risk mitigation tools and participate in Pre-Startup Safety Reviews
- Manage environmental permits
- Perform various and regular safety inspections of the facility and key equipment
- Conduct task hazard assessments and job safety analyses of new processes and materials approvals or substitutions
- Manage safety training schedules for various teams and departments
- Deliver and document initial and ongoing EHS training
- Actively participate or lead site Safety Committee meetings
- Work closely with departments to ensure EHS requirements are being addressed and met

What You'll Bring

- 5+ year's experience in environment, health and safety roles supporting pilot manufacturing R&D, Manufacturing or Engineering functions as well as direct experience with Process Safety and design teams
- Bachelor's of Science in related field; Safety, Environmental, Engineering, etc.
- Preferred (but not required): Advanced degree in Safety, Chemistry, or Engineering
- ASP/CSP/CHMM or similar safety certifications preferred but not required.
- Proven results working within Control of Hazardous Energy, Permit required Confined Spaces, Pre-Startup Safety Reviews, High temperature work and Consulting on risk mitigation to reduce hearing conservation, musculoskeletal injuries, respirator requirements and required PPE.
- Direct experience with navigating regulatory requirements as they relate to Large Quantity Generator status, satellite and 90-day accumulation areas, and disposal of wastes
- Extensive knowledge of hazards around manufacturing tooling

- Application of OSHA General Industry requirements & Title IV permit applications
- The following certifications are required: HAZWOPER certification, RCRA/Title 22 training, DOT/IATA certifications

Form Energy is committed to equitable compensation and we offer a generous benefits package to make sure you have the support you need. We cover 100% of employee premiums and 80% of dependent premiums for medical, dental, and vision insurance for full time employees. We offer a flexible Paid Time Off program and every employee, regardless of gender identity or expression, is eligible for 12 weeks of paid parental bonding leave. We offer a 401k and all employees are granted stock options. A full listing of our benefits is available on our careers page.

At Form Energy, we are working toward a 100% renewable energy future for everyone in the world. We are committed to creating an inclusive environment for all our employees and are seeking to build a team that reflects the diversity of the people we hope to serve with our revolutionary products. Form Energy is proud to be an equal opportunity employer.
